Caryn Petker
Vice President of Talent
Sortable
160 King St E
Kitchener, ON N2G 4E5

Dear Ms. Petker:

I wish to apply for the position of software developer at your company.

My enclosed resume highlights my skills, abilities, and education. I am presently in grade 10. I have a passion for computer science and programming and have experience working with Python. My main operating system is Ubuntu, hence I have experience working in Linux. I also have experience working in the cloud. I mainly use Google's cloud services (Firebase, App Engine, Compute, Datastore), but I am working on a project which uses AWS.

I believe I am a very reliable person. I always try to complete any tasks given to me to the best of my ability, and put any other tasks second. I believe I am also a great team member. I am able to follow instructions correctly and ask questions when necessary. I also have problem solving skills. I always think through a problem rigorously first and see if I can solve the problem myself. If needed, I don't hesitate to confirm my solution with my supervisors.

My career goal involves working in a computer science environment; therefore, I look forward to discussing my qualifications for the position with you. I may be reached at 519-591-0414 if you wish to contact me. I will contact you on November 2nd at 3 p.m. to see if you have any questions that I can answer for you regarding my resume and skills.
Thank you for your time and consideration.

Sincerely,

Cristian Bicheru
